Provider: Cambridge Architectural  
Provider #: J845  
Program #: CamDFFLunch  
Program Name: Lunch & Learn: Architectural Mesh Systems – Design Freedom and Functionality  
Length: 1 hour  
Credits: 1 LU/SD/HSW credit hour  
HSW: Yes  
SD: Yes

---

---

**Description:** This course explores woven metal fabric – used historically as a utilitarian industrial product - as a new architectural material that provides valuable functionality in addition to stunningly unique aesthetics.

**Learning Objectives:**

- Explore how woven metal fabric (mesh) has expanded its original use as an industrial product into an architectural product with significant utility.
- List four functions that architectural mesh may perform.
- Understand the three specification steps required to ensure maximum functionality from mesh and to achieve your design intent.
- Identify at least three ways in which architectural mesh systems contribute to principles of sustainable design.
- Compare and contrast characteristics and costs of other building materials that architectural mesh may replace in a building design.

**How Taught:** This course is taught by qualified Cambridge Architectural representatives, using PowerPoint, as a

lunch and learn course. The instructor will record attendance.

**A/V Needs:** A PC laptop-compatible projector.

**Target Audience:** All levels of design and project architects, specifiers, interior designers, owners and other design professionals. The ideal audience size can be 10-40 people.

**Facilitator Qualifications:** Cambridge Architectural sales representatives have undergone extensive training in the design and installation of architectural mesh systems and are experts in their field.

**Costs:** Course is free of charge.

**Credit Reporting:** The instructor requires Form B completion at the end of the program. The instructor then report credits to the AIA/CES records office and will email the learner a certificate of completion. The instructor does not report credit to state licensing boards; that is the responsibility of the architect.

**Expiration Date:** This course is available for AIA/CES credit through December 2014.
